## **HolistiCyber Receives CREST Certification: International Recognition as A Top Cyber Security Organization**

*November, 2018; Tel Aviv, Israel*—HolistiCyber has been recognized by CREST as a top cyber security company through a demanding accreditation process, offering assurance to clients that only best practices are followed. CREST, the Council of Registered Ethical Security Testers, is a not-for-profit accreditation and certification body and trade association that represents and supports the technical information security market.

CREST was set up in 2006 in response to the clear need for more regulated professional services in the cyber world, and is now recognized globally as the cyber assurance body for the technical industry. CREST provides internationally recognized accreditations for organizations and individuals providing penetration testing, cyber incident response, and threat intelligence services. All CREST member companies undergo stringent assessment; while CREST qualified individuals must pass rigorous professional level examinations to demonstrate knowledge, skill and competence. CREST also supports the industry by providing in-depth guidance material and commissioning detailed research projects. All CREST research is provided to the industry free of charge.

CREST is governed by an elected executive board of experienced security professionals who also promote, develop, and support awareness, ethics and standards within the cyber security marketplace.

HolistiCyber was founded with a mission to assist corporations and businesses in defending themselves in a new phase of evolution in cyber threats -- not only in volume, but the level of sophistication. Hackers, often backed by Nation States, use tools developed by the National Security Agency and other top worldwide defense agencies. These have now leaked to the Darknet.

Our holistic approach includes a comprehensive understanding of your business processes, as well as identification of critical and strategic assets, supply chain, human resources, and physical security. All of this comes from the viewpoint of highly sophisticated hackers and attackers-- defending your organization from top to bottom.

HolistiCyber brings years of experience in both the public and private sectors. Our certified experts are cyber security veterans of the Intelligence branch of the Israel Defense Forces (IDF). These world-class experts have served at the front-line of critical nation-state cybersecurity, both in offensive and defensive operations. Our team of expert analysts perform sophisticated, advanced nation-state level cyber security testing and assessments, working with your busy IT staff.

HolistiCyber has become the trusted cyber security advisor to leading organizations globally. Let us put our experience to work for your organization! Contact us for more information.
